

Nifty Outlook

The Indian equity benchmark indices rebounded in Wednesday's session and ended positive amid supportive global cues. The Nifty index opened in the green and traded with positive bias throughout the session, touching an intra-day high of 11,078, before closing up 1% at 11,029 levels. Amongst the broader market indices, BSE Midcap and Smallcap ended higher by 0.9% and 0.5%, respectively. Barring Healthcare, which witnessed selling pressure, all the other sectoral indices ended in the green with Metals, Banks, Capital Goods and Oil & Gas being the top gainers, up 1-2.7%.

We expect the markets to remain volatile in the near term and maintain our cautious stance. Further, in the absence of any fresh domestic triggers as well as the end of earnings season, investors will take cues from global developments. Market participants would keep a watch on the movement of crude oil price and rupee/dollar. Besides positive progress on US-China trade talks would boost investors sentiments. Given the uncertainty, we advise investors and traders to maintain stock-specific approach and avoid risky trades.

Investment Pick - Emami Ltd.

Scrip	CMP	Recommendation Price	Target	Duration
Emami Ltd	298.9	312	455	9-12 Months

- Emami Ltd posted decent results on YoY basis, however on QoQ basis its numbers remained weak. The company's revenue grew by 6% YoY, while its gross margin declined by 209bps due to rise in the input cost. Further, EBITDA and PAT grew by 11% YoY and 48% YoY respectively, while margins expanded by 108bps and 172bps YoY due to decline in advertisement spends (-9.5% YoY). Despite facing challenges with respect to macro-economic factors, demand slowdown and higher input cost, Emami reported better profit numbers for the quarter.
- We believe the company could continue to face near term pressure on demand front. However, going forward, we remain positive on the company's growth prospects, which would be driven by innovating products, promoting core brands, gaining market share, lower raw material prices. We maintain a Buy on the stock with a target price of Rs 455.
