### Technical outlook

Zinc Aug future 4hr Chart has formed "Rising channel" pattern. The last few sessions ended up sideways after retesting the current channel's resistance line. The market is expected to continue on the bullish term based on the current price action, once the same breaks above a key resistance holding at 191.50. The upside rally could be testing all the way up to 193-194.50 levels in the upcoming sessions. Alternatively, if the market struggles to break the resistance level, then it might retest the same and revise the trend to bearish/sideways. Key support holds at 188.
