### Technical outlook

Copper April future 2hr chart has formed "Ascending broadening wedge" pattern. The last few sessions ended sideways mode along with some corrections inside the channel. The market is still expected to continue on bullish momentum based on the

current price action, once the same break above the key resistance holding near 697. The upside rally could be testing all the way up to 700-703 levels in the upcoming sessions. Alternatively, if the market struggles to break the resistance level, then it might revise the trend to bearish/sideways mode. Key support holds at 691. A slide to 688 is also a possibility if the price makes or break below the current support level.
