### **KEDIA ADVISORY**

### Cotton Seed Oil Cake Report

Tuesday, April 20, 2021

#### **Fundamentals**

Cotton yesterday settled down by -0.56% at 21320 as CAI increases the production estimate to 360 lakh bales on higher output in North India. The second wave of Covid-19 is taking its toll on Gujarat's textile industry which saw at least 25% decline in fabric production in the past 15-20 days. Since the beginning of April, production of fabric has gone down in the state from around 5.50 crore metres to almost 4 crore metres per day. Demand from textile traders has gone down drastically. If the situation doesn't improve in next fortnight period, production of fabric would further plummet to as low as 50%. CAI estimated cotton exports to increase by 20% to 60 lakh bales in the 2020-21 season that begins in October, mainly due to higher international prices. If the lockdown increases in Bangladesh, Indian cotton exports will be affected. CAI Crop Committee has estimated the total cotton supply till end of the cotton season 2020-21, that is up to September 30, at 496 lakh bales. Around 35 to 37 lakhs out of the export of 60 to 70 lakh bales of cotton is being exported to Bangladesh. In spot market, Cotton dropped by -220 Rupees to end at 21880 Rupees.Technically market is under long liquidation as market has witnessed drop in open interest by -6.61% to settled at 5380 while prices down -120 rupees, now Cotton is getting support at 21160 and below same could see a test of 20990 levels, and resistance is now likely to be seen at 21580, a move above could see prices testing 21830.

#### **Fundamentals**

Cocudakl yesterday settled up by 0.51% at 2780 as supply of cottonseeds might become tight in the coming kharif season if farmers decide to expand the area under the fibre crop going by the high price that prevailed during the current season to September. Cottonseed production and quality were affected last year due to excessive rains in the key producing State of Telangana and some parts of Tamil Nadu. Due to continuous rains last year, there was lot of damage to seed production in Telangana and Tamil Nadu. Cotton sowing area in the State is expected to increase further in 2021-22 kharif in the backdrop of increase of cotton price in the open market during this season. Cotton price touched Rs 6,500 per quintal in the open market, while the Cotton Corporation of India (CCI) fixed the MSP of Rs 5,550 per quintal. At present, farmers in the State are sowing cotton in 15-lakh acres. It is expected to touch 18-lakh to 20-lakh acres in the kharif season. About 150 spinning mills in the State are generating 2-lakh jobs. The State government and Cotton Corporation of India are also in favour of increasing cotton sowing area in the State and making necessary arrangements to supply seeds and fertilisers to farmers. In Akola spot market, Cocudakl gained by 7.5 Rupees to end at 2807.5 Rupees per 100 kgs.Technically market is under short covering as market has witnessed drop in open interest by -0.93% to settled at 123020 while prices up 14 rupees, now Cocudakl is getting support at 2732 and below same could see a test of 2684 levels, and resistance is now likely to be seen at 2811, a move above could see prices testing 2842.

#### Trading Idea for the day

Cotton trading range for the day is 20990-21830.
