

NATURAL GAS

20/04/2021

Technical outlook

Natural gas 4hr chart has formed “Ascending broadening wedge” pattern. The last few sessions ended up sideways mode along with some corrections inside the channel. The market is expected to continue on the bullish momentum based on the price action, once break above a key resistance holding near 206.

The upside rally could be testing all the way through 209-212 levels in the upcoming sessions. Alternatively, if the market struggles to break the resistance level, then it might retest the same and turn bearish/sideways once again. Key support holds at 203. A slide to 200-197 is also a possibility if the price makes or break below the current support level.
