

## Nifty Outlook

Markets took a breather after the recent rebound and lost nearly a percent on the last trading day of the financial year. The benchmark opened gap down and traded with negative bias throughout the session citing mixed cues. Finally, the Nifty ended near day's low to close at 14,690 levels. A mixed trend was witnessed on the sector front wherein banks, IT and energy were the top losers while realty, FMCG and consumer durables were the gainers. On the flip side, the broader markets outperformed wherein midcap and smallcap closed with gains of 0.3% and 0.4%.

We're seeing erratic swings during this consolidation phase and the divergence between Nifty and the banking index is further adding to the participants' worries. Traders should limit leveraged positions and focus more on the selection of stocks. In absence of any major event, global cues and COVID-related updates will remain in focus.
