

Nifty Outlook

The week started on a negative note for the Indian markets mainly due to sharp surge in COVID-19 cases across the country. Despite, stable global cues, the Indian indices lost its ground and ended with losses of nearly 1.5% to end at 14,638 levels. The broader markets too were not spared as both BSE Midcap and Smallcap ended with losses of nearly 1% each. On the sector front, IT, Healthcare and Metals ended with healthy gains whereas Banking, Auto, and Realty were the top losers.

The sharp surge in COVID-19 cases has dented investor sentiments and has increased fear of harsh restrictions which would impact economic activity. Going forward, government actions to curb the surge would be one of the important factors to watch out for investors. Further, the upcoming RBI monetary policy would be actively tracked by investors. We expect the RBI to maintain its dovish stance and leave key rates to be unchanged.
