

Nifty Outlook

Markets started the week on an optimistic note led by supportive global cues. After a gap-up opening, the benchmark continued its positive momentum led by healthy buying in sectors such as banking (thanks to ICICI results), metals and consumer durables. The broader markets too traded in tandem and ended higher in the range of 0.6-0.9%. Finally, Nifty closed at 14,485 levels, up by 1%.

Upbeat global cues combined with supportive earnings are helping the index to hold at higher levels despite COVID challenges. Also, the recent news of various countries extending help to India in the COVID fight further boosting the sentiment. We remain cautiously optimistic as volatility is likely to remain high on the back of derivatives expiry and upcoming earnings announcements. Banking, metal and pharma are showing tremendous resilience and should be preferred for long trades on dips.
