Nifty Outlook

In a volatile trading session, the markets opened on a firm note however selling pressure in banking stocks led the benchmark indices to trim it gains. Nonetheless, strong buying in IT, Metal and FMCG sectors supported the Nifty index to end higher by 0.4% at 14,874 levels. The broader markets ended firmly higher with both BSE Midcap and Smallcap ending up with gains of 0.6% and 0.7%.

The updates on the action of state governments to curb the rise in COVID-19 cases would keep investors on the edge. Further, the earnings announcement from Nifty majors next week would also induce stock specific volatility. On the global front, movement in global indices, bond yields, currency and crude oil would be actively tracked.
