A Daily Report on Agricultural Commodities

Thursday, April 22, 2021

**TODAY'S PICKS** 

## **AGRI BUZZ**

- Strong soymeal export coupled with lower supply in spot markets have catapulted April soybean contract on the National Commodity and Derivatives Exchange to record high levels in three consecutive sessions
- The Maharashtra government has further tightened curbs in the state, allowing groceries, vegetables, and fruit vendors to remain open only between 0700 IST and 1100 IST. All these shops, though, can deliver at home between 0700 IST and 2000 IST, subject to the local authority.
- The government has procured nearly 8% of the targeted 3.25-mln-tn chana for 2020-21 (Apr-Mar) as of Wednesday from farmers in seven states under the price support scheme, an official said.
- The Maharashtra Cabinet has requested Chief Minister Uddhav Thackeray to announce a complete lockdown in the state from Wednesday, health minister Rajesh Tope reportedly said.
- The economic impact of the second wave of the COVID-19 pandemic may intensify in coming weeks as more states may be compelled to imposer stricter restrictions, Noumra said in a report.

## SPICES COMPLEX

## Market Buzz

- Jeera May futures on NCDEX posted losses for the third straight day on Tuesday on weak demand.
- Traders at the Unjha Agricultural Produce Market Committee have decided to suspend operations for a week, from April 14 to 21, because of the resurgence in coronavirus cases.
- According to a survey conducted by the Federation of Indian Spice Stakeholders, jeera
  production in India is likely to be 478520 tons in 2020-21 (Oct-Sep), down by 11 per
  cent yoy.
- Government estimates 2020-21 jeera output at 887000 tons compared to 912000 tons a year ago.
- According to the second advance estimates released by the Gujarat's farm department, production in jeera is expected to be at 373700 tonnes in 2020-21 compared to 375420 tonnes produced last year (2019-20).
- According to Gujarat's farm department, as of 28 Dec2020, jeera has been sown across 464469 hectares in state, compared to 435657 hectares sown during the same period last year.
- Spices Board pegs Apr-Sep jeera exports at 153000 tonnes, up by 33 per cent on yoy basis.
- Coriander May futures on NCDEX ended flat on Tuesday in tandem with the movement in spot market.
- Government sees 2020-21 coriander output at 720000 tons compared to 701000 tons a year ago.
- Coriander production in Gujarat is expected to rise 55 per cent to 216680 tonnes in 2020-21 season (Jul-Jun) due to sharp rise in acreage according to the state's farm department's second advance estimates.
- As of Dec 28, 2020 coriander has been sown across 135563 hectares compared to 76904 hectares sown during the same period last year showed the data from the Gujarat state farm department.
- According to Spices Board of India data, coriander exports for the Apr-Sep period this year is seen at 26750 tonnes, up by nine per cent on yoy basis.
- Turmeric May futures on NCDEX gained over two per cent on Tuesday on fall in arrivals in the spot market.
- Government sees 2020-21 turmeric output at 1.11 million tonnes compared to 1.15 million tons a year ago.
- Government pegs 2020-21 cardamom output at 25000 tons compared to 21000 tons a year ago.

**TECHNICAL VIEW** 

JEERA NCDEX MAY	May stretch the weakness towards 14040/13940 from where a bounce back may not be ruled out. However, sustained trades below 13940 accompanied by considerable volume may see weakness intensifying.	*
DHANIYA NCDEX MAY	While there prevails weakness, pullbacks to 7050/7130 may not be ruled out before resuming declining. However, a direct fall below 6800 may see weakness intensifying.	4
TURMERIC NCDEX MAY	A voluminous rise above 8500 is required for more upside. As long as this range caps, sideways to weak trades are expected.	4
CARDAMOM MCX MAY	Choppy trades expected.	<b>₽</b>

## **OILSEED COMPLEX**

## Market Buzz

- All commodities in the oilseed basket traded higher on Tuesday, MCX Apr CPO prices traded higher tracking
  gains in international market on strong export demand for palm oil in Malaysia, May Soy oil prices hit all time
  high on positive cues from domestic soybean prices.
- NCDEX May soybean prices continued to trade higher and testing new highs on back of strong demand for soymeal from exporters along with dwindling supplies along with gains in U.S. GDT soybean prices. May NCDEX Mustard seed prices traded higher due to higher crushing demand amid lower arrivals.
- According to data by the Solvent Extractors Association, soymeal exports for March was recorded at 146,379 tn, up 346% on year.
- The National Commodity Clearing Ltd has raised the pre-expiry and lean period margin on soybean to three and four percent respectively in all contracts to check the excessive volatility of the prices in the near term.
- India's soymeal exports jumped nearly fourfold on year to 220,000 tn in March, The Soybean Processors Association of India data showed. In the same month a year ago, exports were at 58,000 tn. Overseas shipments of the oil meal rose significantly due to strong demand from France, Germany, the Netherlands, and Qatar, traders said. During Oct-Mar, exports jumped to 1.59 mln tn from 423,000 tn a year ago, SOPA data showed.
- Sri Lanka's decision to ban import of crude palm oil is unlikely to impact global prices, market experts said. Sri Lanka buys palm oil in small quantity and its decision to stop the import is unlikely to lead to a global glut.
- Crushing of mustard seeds rose 60% on year to 1.2 mln to across the country in March, data from Marudhar Trading Agency showed. Mills had crushed 750,000 to of the oilseed during the same period last year.
- India's 2020-21 (Jul-Jun) mustard output is seen rising to 22.6% on year to 8.95 mln tn, according to a joint survey by the Central Organisation for Oil Industry and Trade and the Mustard Oil Producers' Association.
- India's vegetable oil imports dropped nearly 25% on year to around 838,607 tn in February, The Solvent Extractors'
   Association of India said. During Nov-Feb, the country imported 4.39 mln tn of vegetable oil, down 3.7% from
   the vegr-ago period.
- The US Department of Agriculture has scaled up its estimate for global oilseed production for 2020-21 to 598.0 mln tn from 595.8 mln tn projected in March. The upward revision is due to higher soybean, rapeseed, and peanut production. The rise is, however, limited due to smaller palm kernel, sunflower seed, and cottonseed crops, the agency said. Global soybean output is estimated at 363.2 mln tn, up by 1.4 mln tn, mainly due to higher production in Brazil. Global soybean crush is estimated 2 mln tn lower at 96 mln tn largely because of a smaller crush in China. World soybean exports are estimated 1.2 mln tn higher at 170.9 mln tn due to robust shipments from Brazil, Russia, and the US. The agency has projected world soybean ending stocks 3.1 mln tn higher at 86.9 mln tn, as purchases from China and Brazil are seen rising. The agency maintained its estimate for soybean output in the US at nearly 112.6 mln tn for 2020-21.
- India is likely to produce around 10 mln tn of mustard in 2020-21 (Jul-Jun), up 35% from a year ago, due to higher
  acreage and favourable weather conditions, according to the Solvent Extractors' Association of India.
- The government has proposed agriculture infrastructure and development cess on key edible oils in the Union Budget for 2021-22 (Apr-Mar). In the case of crude palm oil, the cess would lead to rise in overall effective duty by 5.5 percentage points to 35.75%. No major changes is seen in effective crude soyoil duty and crude sunflower oil.
- Farmers in the country have sown mustard across 6.9 mln ha, up 10.6% on year, in 2020-21 (Jul-Jun) season so far, data from the farm ministry.
- Indian government slashed import duty of crude palm oil. The government cut import duty on crude palm oil by 10% to 27.5%, in the last week, to cool off soaring edible oil prices in domestic markets.
- The area under major kharif crops so far in 2020-21 (Jul-Jun) was at 111.7 mln ha, up nearly 5% from a year ago, farm ministry data showed. The area under soybean across the country rose 6.4% on year to 12.12 mln ha as of 24th Sep, according to data from the farm ministry. The Union Cabinet approved a hike in minimum support price for 14 major kharif crops. MSP for soybean hiked by Rs.170 to 3880 from 3710 per 100 kg. Soybean output is estimated at 12.2 mln tn in 2019-20, according to the farm ministry's fourth advance estimate.
- India is likely to grow a record 10 mln tn mustard crop in 2020-21 (Jul-Jun), mainly due to the likelihood of a sharp rise in acreage, according to Solvent Extractors' Association of India. The government has targeted an alltime high crop of 12.5 mln tn for this rabi season. The government has fixed the minimum support price at 4,650 rupees per 100 kg for 2020-21 (Apr-Mar) marketing season against 4,425 rupees per 100 kg the previous year.
- According to the first advance estimates for 2020-21 (Jul-Jun), castor seed output is seen at 1.7 mln tn compared
  with 1.8 mln tn in the fourth advance estimates for 2019-20, according to the data released by the farm ministry.
  While, according to traders, crop is seen at 1.5-1.6 mln tn. Farmers have sown castor seed across 792,000 ha in
  2020-21 (Jul-Jun), down 16% from a year ago.
- India's castor oil exports fell 5.2% on year to 43,516 tn in February, according to data from Solvent Extractors' Association of India. A year ago, exports were at 45,900 tn.
- Malaysia's crude palm oil output rose 28.4% on month to 1.4 mln tn in March, data from Malaysian Palm Oil
  Board showed. Total palm oil stocks in the country increased 10.7% on month to 1.4 mln tn. Exports of palm
  oil in March jumped up 31.8% on month to nearly 1.2 tn. Export of biodiesel fell over 50.9% on month to
  13,839 tn.
- Malaysia's palm oil exports, so far in April, were seen 12.7% higher on month at 826,908 tn, according to data from cargo surveyor SGS (Malaysia) Bhd.

## **TECHNICAL VIEW**

t e r s 9	SOYBEAN NCDEX MAY	Major sentiments seems to be positive and expect to see more upside moves targeting 7600 levels. However, expect volatility.	7
r n y r		As long as prices stays above 1400 could see more upside moves targeting 1430/1450 levels.	7
y , f	RMSEED NCDEX MAY	Positive momentum is more likely to see further towards 7200 levels. However, expect severe volatility due to profit booking.	7
a O	CASTOR NCDEX APR	Successful trades above 5200 could see more upside moves targeting 5250 levels.	7
il n o	CPO MCX APR	As long as prices stays above 1200 could see more upside moves targeting 1220/1230 levels.	7

## **COTTON COMPLEX**

#### Market Buzz

- The Cotton Association of India has maintained its export estimate for the ongoing 2020-21 (Oct-Sep) season at 6.0 mln bales (1 bale = 170 kg). In the current marketing year, India has shipped around 4.3 mln bales till March, the association said in a release. The association has also maintained its estimate for ending stocks at 10.6 mln bales. Domestic consumption is seen at 33.0 mln bales in 2020-21, while imports are seen marginally lower at 1.1 mln bales against 1.2 mln bales estimated a month ago. The association has raised its production estimate for the year marginally to 30.0 mln bales, against 35.9 mln bales a month ago. Of the total crop, around 32.7 mln bales have arrived in markets across India till March.
- The US Department of Agriculture has scaled down the global cotton ending stock estimate for 2020-21 (Aug-Jul) to 93.5 mln bales (1 US bale = 218 kg) from 94.6 mln bales pegged in March. The downward revision in stocks is mainly due to lower production and higher consumption estimates. Smaller crop in Australia and rising domestic textile demand in China led to a fall in ending stocks. The US Department of Agriculture has marginally scaled down its global cotton production estimate for 2020-21 to 113.0 mln bales compared with 113.3 mln bales a month ago. Global cotton consumption is seen marginally higher at 117.9 mln bales, compared with 117.5 mln bales. Exports are now seen at 45.5 mln bales, compared with 44.5 mln bales. The agency, in its report for April, has maintained India's cotton ending stock estimate for 2020-21 at 17.4 mln bales. India is expected to export 5.7 mln bales of cotton during the year. Production and domestic consumption estimate for India have been maintained at 29.0 mln bales and 24.3 mln bales, respectively. The average price for the US upland cotton is expected to decline by 1 cent to 68 cents a pound during the current season, the agency said.
- The International Cotton Advisory Committee has scaled up its forecast for global prices in 2020-21 (Aug-Jul), as ending stocks for the ongoing season are estimated to be lower. The committee has revised upwards its price forecast for Cotlook A index, a global benchmark for prices of raw cotton, by 3 cents from the previous month to 79 cents per pound. Lower stock levels provide additional support for prices which have increased over the course of the current season supported by falling production and rising consumption. Global ending stocks for the season are estimated at 20.9 mln tn, compared with 21.4 mln tn in the previous season. Global production for the ongoing season is estimated at 24.1 mln tn, down 8% from the previous season. The fall has largely been attributed to a smaller crop in the US, Brazil, and Pakistan. Production in India, is expected at 6.3 mln tn, compared with 6.2 mln tn in the previous year. In the US, cotton production is estimated at 3.2 mln tn, against 4.3 mln tn a year ago. The committee has estimated global consumption at 24.5 mln tn, compared with 22.8 mln tn last year as manufacturing activity continues to show signs of recovery. Global exports are seen higher at 9.5 mln tn, compared with 9.0 mln tn a year ago.
- The UK-based Cotton Outlook has marginally lowered its estimate for global output in 2020-21 (Aug-Jul) by 85,000 tn to 24 mln tn in its March report. The estimate has been scaled down largely because production is expected to be lower in India and the US. Output is seen higher at 6.3 mln tn in China. For the current season, the agency has lowered its crop estimate for India, the largest producer, to 6.1 mln tn from 6.2 mln tn projected a month ago. Production in the US is seen at 3.2 mln tn. Global cotton consumption in 2020-21 is seen at 24.9 mln tn, against the 24.5 mln tn projected in the previous month. Consumption is seen marginally higher on likely rise in demand from the Indian subcontinent, China and Turkey. As textile supply chains have recovered following the most acute phase of the COVID-related disruption, many spinners have enjoyed good profits and some have been adding new capacity. Ending stocks of the fibre for 2020-21 are seen at 814,000 tn, against 417,000 tn projected last month.
- In the Union Budget for 2021-22 (Apr-Mar), Finance Minister Nirmala Sitharaman proposed customs duty of 5% on cotton and 10% on cotton waste. She also proposed an Agriculture Infrastructure and Development Cess of 5% on cotton, taking the overall customs duty to 10%. Customs duty on raw silk and silk yarn or yarn spun from silk waste has been increased to 15% from 10% earlier.
- The area under major kharif crops so far in 2020-21 (Jul-Jun) was at 111.7 mln ha, up nearly 5% from a year ago, farm ministry data showed. Farmers have sown cotton across 13.04 mln ha in the 2020-21 (Jul-Jun) season, up by 2.1% from a year ago, as of 25th Sept., farm ministry.
- India's cotton output in the 2020-21 (Oct-Sep) marketing year is seen at 38.0 mln bales (1 bale = 170 kg), up 4% on year, according to traders' pegs 2020-21 cotton crop at 37.1 mln bales vs 35.5 mln bales.
- Govt cuts 2019-20 cotton output view to 35.5 mln bales vs 36.0 mln. The government has raised the support price of medium staple cotton by 260 rupees per 100 kg to 5,515 rupees, and that of long staple by 275 rupees to 5,825 rupees.

**TECHNICAL VIEW** 

AGRIDEX NCDEX	If prices break above 1495 could continue upside moves targeting 1510 levels.	
KAPAS NCDEX APR22	Choppy trading session for the day	
COTTON MCX APR	Expect to see downside moves targeting 20900/20800 levels.	<b>&gt;</b>
COCUDAKL NCDEX MAY	Major sentiments could be positive and successful trades above 2800 could see more upside moves targeting 2875/2890 levels.	7

## **OTHERS**

#### Market Buzz

- Chana May futures on NCDEX pared initial gains to end the session more than two per cent down on Tuesday.
- The government has procured nearly eight per cent of the targeted 3.25 million tonnes of chana under the price support scheme for the marketing year 2021-22.
- Govt. aims to increase chana procurement by nearly 55 per cent to 3.25 million tonnes in the marketing year 2021-22 beginning April, under the price support scheme.
- The government has approved procurement of 14350 tons of chana Bihar during 2021-22 rabi marketing season.
- The farm ministry has approved the procurement of 61000 tonnes of chana from Maharashtra in 2021-21 under the price support scheme according to the NAFED.
- The farm ministry has approved the procurement of 51325 tonnes of chana from Telangana in 2021-21 under the price support scheme according to the NAFED.
- Farm Commissioner expects 2020-21 chana output to be at 11.5 million tonnes compared to 11.4 million tonnes a year ago.
- India's guar gum exports improved in the month of December 2020 by 32% to 17,644 tonnes compared to 13,414 tonnes during November 2020 at an average FoB of US \$ 1849 per tonne in the month of December compared to US \$ 1611 per tonne in the month of November 2020. However, the gum shipments were down -1% in December 2020 compared to the same period last year. Of the total exported quantity, around 4,914 tonnes is bought US, Russia (3,290 tonnes) and Germany (2,432 tonnes).
- India's guar split exports fell in the month of December 2020 by -39% to 2,800 tonnes compared to 4,557 tonnes during November 2020 at an average FoB of US \$ 955 per tonne in the month of December compared to US \$ 1,390 per tonne in the month of November 2020. Further, the guar split shipments were up +32% in December 2020 compared to the same period last year. Of the total exported quantity, around 1,880 tonnes is bought China, US (800 tonnes) and Switzerland (120 tonnes).
- MCX April rubber futures bounced back from the nine weeks low on Tuesday. Rise in crude oil prices and cues from the overseas market amidst tight supplies lend support.
- Global natural rubber production in March is likely to have risen 1.3% on year to 910,000 tn, the Association of Natural Rubber Producing Countries said. Consumption during the month may have risen 7.4% on year to 1.23 mln tn.

## **TECHNICAL VIEW**

CHANA NCDEX MAY	Pullbacks to 5650-5675 may not be ruled out before resuming declining. An unexpected rise above 5725 may call for 5780-5800 or more.	>
GUARSEED NCDEX MAY	A voluminous rise above 4180 or a fall past 4050 could lend fresh directions for the day.	4
GUARGUM NCDEX MAY	Corrective dips to 6200/6130 ranges may not be ruled out before bouncing back.	4
RUBBER MCX APR	Short-covering seen after taking support around 15500 may stretch towards 16050/16250 or even more to 16450. However, a voluminous rise above 16800 is mandatory for weakness to lessen.	>

Pivot Point: A predictive indicator of the market which is calculated as an average of significant prices from the performance of a market in the prior trading period. An open above the pivot point is generally considered bullish and vice versa.

S1, S2 & S3 are supports and R1, R2, and R3 are resistances from where a turnaround can be anticipated.

\*Open, High, Low and Close prices of previous trading day

Strong bias or bullish

Trading signals is prepared based on statistical analysis and is purely on technical indicators like exponential moving averages (EMAs), Relative strength Index (RSI) and stochastic, putting altogether provides an idea about intraday, short, medium and long term trend of the commodities. It also signals the risk of an investment in both agricultural and global commodities as well. Based on all listed indicators above, investors were able to fix a daily, near-term and long term trends. However, must be cautious especially for real-time intraday traders/jobbers.

#### Trading Strategy based on EMA

Trading strategies mentioned in the report is mainly based on 3, 5, 13, 22, 45 & 60 days exponential Moving Averages. 3 and 5 day EMA has taken for developing Intraday trading strategy, 13 days and 22 days EMA for Short term and Medium term, while 45,60 days EMA for Long term. Here, we use EMAs for POSITIVE and NEGATIVE signals. POSITIVE signal is formed when a short-term moving average (eg: 30 day) crosses from below a longer-term average (eg: 60 day), which is considered bullish. Likewise, NEGATIVE signal is formed when a short-term moving average (eg: 30 day) crosses from above a longer-term moving average (eg: 60 day), which is considered bearish.

Intraday and Overall view. The section is consist of both Intraday and Overall view. The Intraday view is calculated by netting out of POSITIVEs/REGATIVEs/FLAT signals formed in the short term trend. On the another part, Overall view is calculated by netting out number of POSITIVEs/NEGATIVEs/FLAT signals formed in the short, Medium and long term trend.

Volatility is a measure for dispersion of price of a financial instrument over a period of time by using Standard deviation and annualised actual volatility. Standard deviation is used to calculate one day volatility. Whereas, Annualized Actual Volatility (AAV) is measured as annualized standard deviation of the continuously compounded daily returns of the asset. Generally the thumb rule is that, higher the volatility higher the risk of the asset. See the table below the range risk ratings.

Annualised	Risk %	Ratings	Risk %	Ratings	Risk %	Ratings	Risk %	Ratings	Risk %	Ratings
Volatility >	> 35%	Very High risk	27 to 34%	High risk	20 to 26%	Moderate risk	11 to 19%	Low risk	1 to 10%	Very Low risk

## GENERAL DISCLOSURES & DISCLAIMERS:

CERTIFICATION,

We, Vinod TP, Hareesh V and Anu V Pai, employee of Geojit Financial Services Limited (GFSL), author of this report, hereby certify that all the views expressed in this research report (report) reflect my/our personal views about any or all of the subject issuer or securities/ commodities.
