### Nifty Outlook

Markets extended yesterday's gain and ended higher over a percent. The benchmark opened flat amid mixed global cues however it gradually inched higher as the day progressed citing investors' expectations from earnings outcome by heavyweights. Sectors such as banking, metals, consumer durable witnessed healthy buying interest from participants. In addition, the progress of the vaccination drive and a dip in the COVID cases further boosted sentiments. Consequently, the Nifty ended with gains of 1.2% to close at 14,653 levels. The broader markets too ended in positive in the range of 1-1.4%. All the sectoral indices ended in green.

We're currently dancing to the global tunes and prospects of upbeat earnings have further strengthened the recovery. We feel Nifty can test 14,800 next if it manages to hold above the 14,600 zone. Participants should align their positions accordingly and prefer sectors that are showing consistent buying interest.
