

CRUDEOIL

09/12/2021

Technical outlook

MCX Crude Oil technical chart has taken the formation of "Descending broadening wedge" pattern in 4hr time frame. While few sessions have been in sideways rallies with some corrections. The last one has traded a little higher and closed in green once again. As per the

technical aspects based on the current price action, the market is expected to continue on bullish trend, once the same break above the current key resistance level holding near 5500. The upside rally could be testing all the way up to 5560-5610 levels in the upcoming sessions. An alternative scenario indicates that if the market struggles to break the resistance level, then it might retest the same and revise the trend to bearish/sideways mode once again. Key support holds near 5410. A slide to 5350-5300 is also a possibility if the price makes or break below the current support level.
