Technical outlook

MCX Crude Oil technical chart has taken the formation of "Ascending broadening wedge" pattern in daily time frame. While few sessions have been in sideways rallies with some corrections. The last one has traded a lower and closed in slight red. As per the technical aspects based on the

current price action, the market is expected to continue on bearish trend, once the same break below the current key support level holding near 5320. The downside rally could be testing all the way up to 5260-5210 levels in the upcoming sessions. An alternative scenario indicates that if the market struggles to break the support level, then it might retest the same and revise the trend to bullish/sideways mode once again. Key resistance holds near 5480.
