

NATURAL GAS

13/12/2021

Technical outlook

Natural gas daily chart has formed “Descending broadening wedge” pattern. Over the last few sessions, we have seen some rapid movements, where the last one had traded a sideways and closed in green. The market is expected to continue on the bullish momentum based on the price action, once break above the strong resistance holding near 300. The upside rally could be testing all the way through 305-310 levels in the upcoming sessions. Alternatively, if the market struggles to break the resistance level, then it might retest the same and turn bearish/sideways once again. Key support holds at 285.
