Technical outlook

MCX Silver Mar futures technical chart has taken the formation of "Rounded top chart" pattern in daily time frame. There have been a few sideways sessions along with slight corrections within the channel, where the last one has traded higher and closed in green. The market is expected to

continue on bullish momentum based on the current price action, once the same break above the key resistance level holding near 61800. The upside rally could be extending all the way up to 62400-63000 levels in the upcoming sessions. An alternative scenario indicates that if the market struggles to break the resistance level, then it might retest the same and revise the trend to bearish/sideways mode once again. Key support holds near 60600. A slide to 60000 is also a possibility if the price makes or break below the current support level.
