NIFTY - 15208.90, -0.68%
Price

Nifty opened sharply lower with a downward gap and selling pressure throughout the session dragged it lower to close on a negative note. Nifty closed at 15209 with a loss of 105 points.

On the daily chart the index has formed a bearish candle but is currently trading at all time highs indicating that current price action might just be a pullback. The index continues to move in a Higher Top and Higher Bottom formation on the hourly chart indicating positive bias. The chart pattern suggests that if Nifty breaks and sustains below 15100 level it would witness selling which would lead the index towards 15000-14800 levels. Important Resistances for the day are placed at 15500-15600. Nifty is trading above its 20 day SMA which indicates positive bias in the short term. Nifty continues to remain in an uptrend in the medium and long term, so buying on dips continues to be our preferred strategy.

The daily strength indicator RSI continue to remain flat and is above its reference line indicating absence of momentum on either side

The trend deciding level for the day is 15230. If NIFTY trades above this level then we may witness a further rally up to 15290-15375-15435 levels. However, if NIFTY trades below 15230 levels then we may see some profit booking initiating in the market, which may correct up to 15150-15090-15005 levels
