### Product basket: Technical and Derivatives Research

	EQUITY				
	PRODUCT	HOLDING PERIOD	CHARACTERISTICS	FREQUENCY	
	INTRADAY	Same day	The aim is to capture a minimum of 1% move. All those recommendations that do not hit the target or stop loss are advised to be closed out at 3 10 pm.	10-15 per day	
CASH	втѕт	5 days	At times, some of the price moves do not mature fully during the day. Such set ups are best played by entering in the second half of the day with expectations of a momentum surge on the next day.	1-3 per day	
	SHORT TERM	30 days	Uses classical technical studies to deliver moves that takes a while to mature. However, they are less volatile than BTST or intraday products, are directional and have the potential to be multihaggers	4-8 per month	

	DERIVATIVE				
	PRODUCT	HOLDING PERIOD	CHARACTERISTICS	FREQUENCY	
	OPTIONS	1-5 days	Naked options are best ploy to make use of sudden price spurts, but also brilliant in making use of time decay, especially on approach of expiry.	2-3 per day	
OPTION	OPTION STRATEGY	Till expiry	Multi legged option strategies are best suited for volatile and uncertain conditions especially ahead of events, earnings, etc. They are also ideal for generating small, but consistent incomes without worrying about direction.	4-8 per month	
FUTURE	FUTURE	1-5 days	Suited for those with higher risk appetite, who are looking to gain more from the underlying's (stock/index) move.	1-2 per day	
	BTST/STBT	5 days	Characteristics are similar to BTST product in Cash	1 per day	

All our technical & derivative research recommendations can be seen and traded in SELFIE, our trading platform.
