

CPI inflation at 16-month low in Jan'21; IIP rises once again in Dec'20

Do not expect any change in policy stance

- CPI-based retail inflation came in at a 16-month low of 4.1% YoY in Jan'21 (v/s 4.6% in Dec'20 and 7.6% in Jan'20). This was lower than both our forecast of 4.3% and the market consensus of 4.4%.
- Food inflation came in at a 20-month low of 1.9% YoY in Jan'21 (v/s 3.5% in Dec'20) due to more-than-two-year-high deflation of 15.8% YoY in 'Vegetables' in Jan'21 (v/s inflation of 50% in Jan'20). In fact, inflation in other major food items – such as 'Cereals and Products', 'Pulses and Products', and 'Milk and Products' – also moderated considerably in Jan'21.
- Inflation in core items (Housing, Clothing and Footwear, and Miscellaneous Items) remained unchanged at 5.3% YoY in Jan'21. Within Miscellaneous Items, Education, Personal Care and Effects, and Household Goods and Services exhibited lower inflation in Jan'21 v/s Dec'20.
- Separately, IIP edged up 1% YoY in Dec'20 (v/s decline of 2.1% YoY in Nov'20 and 0.4% growth in Dec'19). This was contrary to the market consensus of decline of 0.2% YoY, but in-line with our expectation of +1.3% YoY in Dec'20.
- While Manufacturing activity grew at 1.6% YoY in Dec'20 (v/s decline of 2% YoY in Nov'20), Power Generation posted growth of 5.1% YoY in Dec'20 (v/s 3.5% YoY in Nov'20). Mining activity, however, continued to decline, albeit slower in Dec'20. Moreover, according to use-based classification, production in Capital Goods was up 60 basis points in Dec'20 (after contracting 7.4% YoY in Nov'20) and that in Consumer Goods also grew 3.1% YoY in Dec'20 (v/s a contraction of 2.2% in Nov'20).
- With actual IIP numbers, our monthly [EAI-GVA](#) for Dec'20 now stands revised, indicating growth of 4% (from 3.9% earlier). Overall, although core inflation remaining sticky calls for some vigilance, headline inflation being close to the RBI's medium-term target of 4% is certainly a good sign. Therefore, the RBI's continued guidance to focus on growth – while ensuring headline inflation remains in check – suggests a rate cut is unlikely in the near future.

I. Retail inflation at 16-month low in Jan'21

- **CPI inflation declined further in Jan'21...:** CPI-based retail inflation came in at a 16-month low of 4.1% YoY in Jan'21 (v/s 4.6% in Dec'20 and 7.6% in Jan'20). This was lower than both our forecast of 4.3% and market consensus of 4.4% (*Exhibit 1*).
- **...due to collapse in food inflation:** Food inflation (CPI weight: 39.1%) came in at a 20-month low of 1.9% YoY in Jan'21 (v/s 3.5% in Dec'20 and 13.6% in Jan'20). Lower food inflation was attributable to more-than-two-year-high deflation of 15.8% YoY in 'Vegetables' in Jan'21, v/s inflation of 50% in Jan'20 (*Exhibit 2*). In fact, inflation in other major food items also moderated considerably. Inflation in 'Cereals and Products' was just 0.1% YoY – the lowest since the new series began in 2011; inflation in 'Pulses and Products' stood at 13.4% YoY (15-month low), and that in 'Milk and Products' stood at 2.7% YoY (15-month low) in Jan'21. These four items account for ~25% weight in the CPI basket. On a concerning note, CPI inflation, excluding food, inched higher to 5.5% YoY in Jan'21 (v/s 5.4% YoY in Dec'20).
- **Core inflation remained sticky last month:** Inflation in core items (Housing, Clothing and Footwear, and Miscellaneous Items – CPI weight: 44.9%) remained unchanged at 5.3% YoY in Jan'21. Within Miscellaneous Items, Education, Personal Care and Effects, and Household Goods and Services exhibited lower inflation in Jan'21 v/s Dec'20.

- **Other non-food items, however, showed higher inflation:** Items such as ‘Non-Alcoholic Beverages’; ‘Prepared Meals, Snacks, Sweets, etc.’; ‘Pan, Tobacco, and Intoxicants’; and ‘Fuel and Light’, however, have been exhibiting higher inflation for the past two months. Inflation stood at 13.2%/5.1%/10.9%/3.9% YoY in Jan’21 v/s 11.9%/4.8%/10.7%/3% YoY in Dec’20.
- **Do not expect further monetary easing:** Overall, although core inflation remaining sticky calls for some vigilance, headline inflation being close to the RBI’s medium-term target of 4% is certainly a good sign. Therefore, the RBI’s continued guidance to focus on growth – while ensuring headline inflation remains in check – suggests a rate cut is unlikely in the near future.

Core CPI#	4.5	5.8	4.0	4.2	5.6	5.3	5.3

‘Housing’, ‘Clothing and footwear’ and ‘miscellaneous’

II. IIP growth exhibits volatility

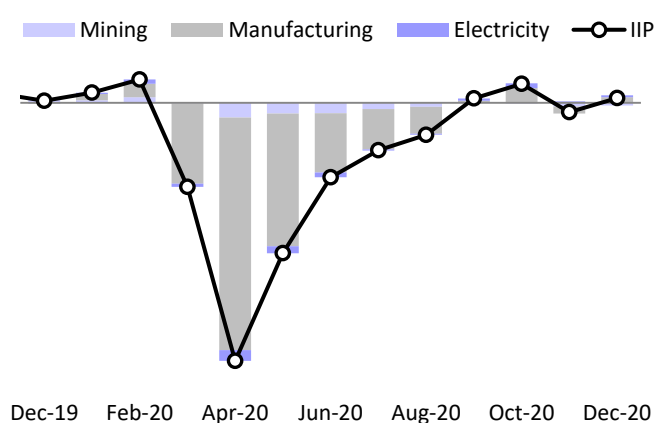

- IIP grew once again in Dec'20...:** IIP edged up 1% YoY in Dec'20 (v/s decline of 2.1% YoY in Nov'20 and 0.4% growth in Dec'19). This growth was contrary to the market consensus of 0.2% YoY decline, but in line with our expectation of growth of 1.3% YoY in Dec'20. Notably, IIP numbers for Sep'20/Nov'20 have been revised to -7.1%/4.2% from -7.4%/3.6% earlier. With this, IIP exhibited its first growth of 1% YoY in six quarters in 3QFY21. (*Exhibit 6*).
- ...led by growth in Manufacturing activity:** Manufacturing (IIP weightage: ~78%) activity grew 1.6% YoY in Dec'20 (v/s decline of 2% YoY in Nov'20). Power Generation also registered growth of 5.1% YoY in Dec'20 v/s 3.5% YoY in Nov'20. Mining activity, however, continued to decline, albeit slower in Dec'20 v/s Nov'20 (*Exhibit 7*). Within Manufacturing, four sub-industries – Chemicals, Pharmaceuticals, Rubber, and Basic Metals – which accounts for ~28% weightage, exhibited impressive growth in Dec'20.
- Capital Goods and Consumer Goods led overall growth:** According to use-based classification, production in Capital Goods was up 60 basis points in Dec'20 (after contracting 7.4% YoY in Nov'20) and that in Consumer Goods grew 3.1% YoY in Dec'20 (v/s contraction of 2.2% in Nov'20). While Infrastructure and Construction activity continued to rise (albeit slower) in Dec'20, production in Intermediate Goods inched up 0.4% YoY during the month (v/s decline of 2.6% YoY in Nov'20). Finally, Primary Goods production contracted at the slowest pace in 10 months by 0.3% YoY in Dec'20 (*Exhibit 8*).
- Continue to expect real GDP between -1% and +1% in 3QFY21:** With actual IIP numbers, our monthly [EAI-GVA](#) for Dec'20 now stands revised, with growth of 4% (from 3.9% earlier), which is not a major change. We continue to expect real GDP between -1% and +1% YoY in 3QFY21.
