Fundamentals

Cotton yesterday settled up by 0.14% at 21470 following market expectation of yet another month of lower world cotton stock revision by USDA. Export prospects of Indian cotton has increased once again as domestic prices are a huge discount from overseas cotton prices, which may increase the attractiveness of Indian cotton in the global market. The 2020/21 U.S. cotton supply and demand forecasts show slightly higher exports and lower ending stocks relative to last month. The export forecast is raised 250,000 bales to 15.5 million based on a strong pace of shipments to date. Ending stocks are now estimated at 4.3 million bales. The USDA projects the upland cotton marketing year average price received by producers at 68 cents per pound, unchanged from its January estimate. The 2020/21 world cotton forecasts include higher production, consumption, and imports, led by changes in China. World production is projected 1.3 million bales higher this month, with China's forecast raised by 1.5 million bales as the daily rates of both ginning and inspections in Xinjiang continue to show late-season strength, which is an unusual price behavior. Reports from China continue to suggest 2020/21 cotton area in Xinjiang was little changed from last year, but government classing data now indicates yields could be about 10 percent higher, while lower in Eastern China. In spot market, Cotton gained by 50 Rupees to end at 21380 Rupees. Technically market is under short covering as market has witnessed drop in open interest by -7.69% to settled at 4251 while prices up 30 rupees, now Cotton is getting support at 21410 and below same could see a test of 21360 levels, and resistance is now likely to be seen at 21550, a move above could see prices testing 21640.
