Global Debt Market:

US 10-year (10Y) bond yields remain extremely low by historical standards despite the recent pick-up to 1.4%. Real yields are around -1% compared to a peacetime average of 2% since 1900.10Y yields move with the cycle and this recovery will be relatively short. The increase in yields should be gradual - with the 10Y yield rising to 2% over the next two to three years - but there are significant risks of a considerably faster correction. Further upward pressure on US government bond yields is likely over the medium term as huge stimulus speeds the recovery.

10 Year Benchmark Technical View:

10 year Benchmark (5.85% GS 2030) yield likely to move in the range of 6.12%

to 6.16% level on Thursday.
