Nifty Outlook

Markets ended almost unchanged in a volatile trading session, taking a breather after a strong surge. Initially, supportive global cues led to a firm start however profit-taking in the latter half trimmed all the gains. On the benchmark front, the Nifty index settled above 15,100 levels. In line with the benchmark, the broader markets too ended flat. Amongst the sectors, a mixed trend was witnessed wherein Auto, IT and Metal ended with losses and other indices like Consumer Durables, Capital Goods and Telecom managed to settle with decent gains.

We might see some consolidation in the index ahead and it would be healthy. We thus advise using intermediate corrective moves to accumulate quality stocks on dips and avoid contrarian trades.

Investment Pick - Castrol India Ltd.									
Scrip	СМР	Recommendation Price	Target	Duration					
Castrol India Ltd.	130.4	134	148	9-12 Months					

 Castrol India (CIL) reported muted set of numbers which were below our estimates. While volumes witnessed decent recovery sequentially, it declined by 3.7% YoY. On the segment front, automobile volumes continued to remain below pre-COVID level whereas the industrial segment witnessed decent growth in Q4CY20.

• Given the muted performance in CY20, we have marginally lowered our estimates for CY21E and CY22E. From a long term perspective, we like CIL given its strong brand equity, continued efforts towards brand building, distribution expansion and new launches. On the financial front, zero debt levels, high dividend payout ratio and strong return ratios make it one of our preferred pick in the sector. Hence, we maintain a Buy on the stock with a target price of Rs. 148.
