

## Nifty Outlook

Markets traded volatile and ended with a cut of over half a percent. Initially, the benchmark opened on a subdued note, tracking mixed global cues and remained range-bound thereafter. Consequently, the Nifty index settled around the day's low to close at 15,209 levels. Among the sectoral indices, power, capital goods and energy ended higher while IT, healthcare and banks closed in the red. On the flip side, the broader markets outperformed and ended almost unchanged.

We're seeing healthy correction however there's no shortage of trading opportunities. We thus reiterate our view to focus more on stock selection and using dips to add quality stocks. On the benchmark front, Nifty has next support at 15,050 levels.

### Derivative Ideas

**TATACONSUM** added around 6% in open interest addition as LONG buildup was seen in it in till closing time. Current chart pattern also indicates further up move in its price. We suggest buying TATACONSUM as per below levels.

**Strategy:-** BUY TATACONSUM IN CASH AT 630 SLOSS AT 620 TRGT 650.

### Investment Pick - Britannia Industries Ltd.

Scrip	CMP	Recommendation Price	Target	Duration
Britannia Industries Ltd.	3,364	3,462	4,265	9-12 Months

Britannia Industries (BRIT) posted mixed numbers wherein revenue was below our expectation while profit grew strong. Revenue came in at Rs 3165.6cr, up by 6.1% YoY. On operational front, its EBITDA grew by 21.7% YoY to Rs 611.5cr, while margin expanded by 248bps on the back of cost efficiencies measures. The company reported healthy growth of 22.4% YoY in net profit at Rs 452.6cr with margin expansion of 190bps YoY to 14.3%. Going forward, we remain positive on the company's long term growth as the focus would be enhancing sales, improving margins via cost efficiency measures and strengthening distribution reach. Maintain a Buy.

Going forward, BRIT strategy would be to drive strong growth by launching new and innovating products, focus on brand building and strengthening distribution reach. Besides its efforts on improving margins via cost efficiency would be its core agenda. Apart from this, strong growth momentum from rural and international businesses will continue to support and lead to market share gains. Further along with the optimistic management plan the company has strong balance and decent cash flow which would aid growth. Thus, we have a positive view on the stock for long term and have maintained a buy rating on the stock with a target price of Rs 4,265.

## Research Product Basket

- For every client, the advisor must allocate a specific proportion of funds for trading and investing depending on the risk taking ability and willingness of the client and their investment goals.
- The below mentioned product basket tries to address the way to deal with the trading portfolio (cash/derivative) for optimum effectiveness of research calls.
- It is recommended to divide your trading funds for various types of calls and not invest the entire amount for 1 or 2 calls only.

For cash market trading					For 1L margin*	
Call / Product	Call Frequency	No. of calls	Avg open call duration	% funds allocated	Total	Per Call
Intraday Calls	Intraday	2 - 3	< 1 day	25%	25,000	8,000
Live / RMD Calls	Daily	3 - 4	3 - 4 days	30%	30,000	4,000
Master Pick	Weekly	1	1 month	15%	15,000	5,000
Religare Alpha	Opportunity	NA	2 - 3 months	20%	20,000	As per weightage
Cash		NA		10%	10,000	
<b>Intraday Calls</b>	These calls are flashed live on Ms Lync and ODIN with the purpose of squaring off positions on the same day. As a policy, we restrict our intraday cash market calls to less than 4 calls a day. Hence, funds should be allocated accordingly to have provision to trade in all calls.					
<b>Live / RMD Calls</b>	2 super ideas are flashed in RMD daily with a view of 3-4 days. Additionally as per market opportunity, we flash live calls during the day (including BTST calls). 3-4 such calls are made on a daily basis which might be open for 3-4 days. Funds should be allocated keeping in mind that there will be 7-8 such open calls daily.					
<b>Master Pick</b>	This is our weekly recommendation shortlisted on the basis of techno-funda analysis. 15% of funds is recommended to be allocated for Master Pick considering that there will be 3 open calls. The average open duration for this call will be 1 month.					
<b>Religare Alpha</b>	This is a portfolio of 8-10 stocks which are held with a view of 2-3 months. It is recommended to allocate 20% of funds for building this portfolio which will provide stability to the overall trading portfolio.					
<b>Cash</b>	10% surplus cash in the portfolio should be kept for the purposes of allocating it to opportunities as and when they arrive.					

For derivative market trading					For 1L margin*	
Call / Product	Call Frequency	No. of calls	Avg open call duration	% funds allocated	Total	Per Call
Derivative Ideas	Daily	1 - 2	1 - 3 days	40%	40,000	40,000
Live calls	Intraday / Daily	1 - 2	3 - 4 days	50%	50,000	50,000
Cash		NA		10%	10,000	
<b>Derivative Ideas</b>	1 derivative idea is shared in RMD daily. It can be a plain vanilla F&O buy/sell call or an option strategy. Funds should be allocated assuming 2 such calls will be open at any time. These calls are open for 3-4 days on an average.					
<b>Live Calls</b>	These calls are flashed on MS Lync and ODIN during live market hours. These calls can be intraday or with a view of 2-3 days. Funds should be allocated considering 2 such calls will be open at any time. 3/4 times, these calls will be on Nifty / Bank Nifty only.					
<b>Cash</b>	It is recommended to hold 10% cash to capitalize on any opportunity that may arise in markets.
