Nifty Outlook

Markets extended the momentum for yet another session and gained nearly a percent. After the initial hiccups, the benchmark gradually inched higher and made a new record high as well. Upbeat global cues combined with decent quarterly earnings from companies supported the rally. Consequently, the Nifty ended at 14,790 levels, higher by 1%. Amongst the broader markets midcap and smallcap outperformed and ended in the range of 1.4-1.5%. All the other sectoral indices, barring FMCG and realty, ended in the green.

The budget has completely turned the market mood and the ongoing earnings season has also been decent so far. We reiterate our bullish view on markets and suggest continuing with the "buy on dips" approach.

Investment Pick - Nippon Life India Asset Management Ltd.

Scrip	СМР	Recommendation Price	Target	Duration
Nippon Life India Asset Management Ltd.	331.15	320	348	9-12 Months

- Nippon Life AMC reported decent set of numbers in Q3FY21 which was largely in-line with our expectations. Its mutual fund QAAUM grew by 6.5% QoQ led by healthy growth in both equity as well as debt AUM which grew by 7.3% and 5.3% QoQ. Further, despite lower yields, PAT grew by 42.7% QoQ driven by higher other income and cost saving initiatives.
- Going forward, we remain positive on Nippon AMC as it plans to regain its lost market share through a series of measures. In the long run, its consistent increase in equity assets, industry leading retail assets and strong presence in B-30 cities augurs well for the growth prospects of the company. Recommend Hold.
