### Technical outlook

Zinc Feb future daily Chart has formed "Rectangle chart" pattern. The last few sessions ended up bullish mode along with some corrections inside the channel. The market is expected to continue on the bullish term based on the current price action, once the same breaks above a key resistance holding near 213. The upside rally could be testing all the way up to 214.50-216 levels in the upcoming sessions. Alternatively, if the market struggles to break the resistance level, then it might retest the same and revise the trend to bearish/sideways. Key support holds at 210. A slide to 208.50 is also a possibility if the price makes or break below the current support level.
