Technical outlook

Zinc Feb future daily Chart has formed "Megaphone chart" pattern. The last few sessions ended up sideways mode along with some corrections inside the channel. The market is expected to continue on the bullish term based on the current price action, once the same breaks above a key resistance holding near 228.50. The upside rally could be testing all the way up to 230-231.50 levels in the upcoming sessions. Alternatively, if the market struggles to break the resistance level, then it might retest the same and revise the

trend to bearish/sideways. Key support holds at 225.50. A slide to 224 is also a possibility if the price makes or break below the current support level.
