### Technical outlook

Copper June future 4hr chart has formed "Descending Triangle" pattern. The last few sessions ended up sideways mode along with some corrections inside the channel. The market is still expected to continue on bearish

momentum based on the current price action, once the same break below the current key support holding near 744. The downside rally could be testing all the way up to 741-738 levels in the upcoming sessions. Alternatively, if the market struggles to break the support level, then it might revise the trend to bullish/sideways mode. Key resistance holds at 750. A slide to 753 is also a possibility if the price makes or break above the current resistance level.
