New figures show global cotton stock levels are set to increase to 22m tonnes by the end of 2020/21 as the stocks-to-use ratio declines. According to the latest update from the International Cotton Advisory Committee (ICAC), China's stocks, however, are expected to decline as the rest of the world's expands slightly. Cotton consumption is expected to increase by 2% to 25.3m tonnes as the global economy continues to recover. Decreases in Brazil, India and the US have caused a reduction in the 2020/21 global production estimate but cotton production — along with consumption and trade — are all expected to increase in 2021/22: Production is expected to increase by 5% to 25.5m tonnes, with increases in planted areas in the US and West Africa. Fundamentals

Cocudakl yesterday settled down by -0.24% at 2886 on profit booking after prices seen supported as Cottonseed production and quality were affected last year due to excessive rains in the key producing State of Telangana and some parts of Tamil Nadu. Support also seen amid prospects of higher exports and falling supply in the physical market. However there were worries of lockdown it is anticipated that there will be slow supply and same with demand. 2021/22 global cottonseed production is projected at nearly 44 million tons, up 5 percent from the current year. Higher forecasts for the United States, Brazil, Australia, and Mali are partially offset by declines in China. U.S. production is forecast up 781,000 tons to nearly 5 million. Waning arrivals of raw cotton due to the fag end of the season and limited stocks of cottonseed with ginners has led to a supply crunch in the market. India has produced around 36 mln bales in the ongoing 2020-21 (Oct-Sep) season, of which nearly 33 mln bales, or 92% of the stock, has already arrived in the market. Considering firm demand outlook for the commodity, the tight supply situation in cottonseed is expected to continue in the coming months as well as the new season for cotton will start only in October. In Akola spot market, Cocudakl dropped by -4.75 Rupees to end at 2858.5 Rupees per 100 kgs. Technically market is under fresh selling as market has witnessed gain in open interest by 16.1% to settled at 48310 while prices down -7 rupees, now Cocudakl is getting support at 2858 and below same could see a test of 2829 levels, and resistance is now likely to be seen at 2919, a move above could see prices testing 2951.

Trading Idea for the day
