

## Nifty Outlook

Markets made a smart comeback after yesterday's slide and gained over half a percent. After the initial uptick, the benchmark gradually inched higher as the day progressed and settled around the day's high. Among the benchmark indices, Nifty ended at 15,738 levels, up by 0.7%. On the sector front, all the other indices, barring auto, ended in positive wherein healthcare, metals and realty were among the top gainers. The broader indices also witnessed sharp recovery and edged higher in the range of 1.3-1.7%.

Markets are keenly eyeing the domestic developments viz. unlocking by states and progress of vaccination programs for cues. Going ahead, we feel the update on the monsoon will also be closely watched by the participants. Major global indices are currently seeing consolidation which may continue to trigger volatility in our markets too. Amid all this, we reiterate our bullish view and suggest using dips or further consolidation to accumulate quality stocks.

**HDFCAMC FUTS** added around 10% in open interest as LONG buildup was seen in it. Current chart pattern also indicates further up move in its price. We suggest buying in HDFCAMC in cash as per below levels.

**Strategy:-** BUY HDFCAMC BETWEEN 3050-3060 STOPLOSS 3010 TARGET 3170.

## Investment Pick - Finolex Industries Ltd.

Scip	CMP	Recommendation Price	Target	Duration
Finolex Industries Ltd.	172.35	173	222	9-12 Months

Finolex Industries Limited (FIL) is a leading manufacturer of PVC pipes and fittings and the only backward integrated player in PVC resin. The company offers the latest range of PVC-U pipes and fittings which are used in agriculture, construction and industrial operations. It has strategically located manufacturing plants and a strong distribution network.

FIL is well established in agri pipes and has plans to expand in non-agri segment, its backward integrated manufacturing of PVC resin, strong distribution network and changing product mix would aid in earning better revenues as well as profits. Besides its strong brand recall value, growth plans and expansion in the PVC pipes segment are encouraging which makes it one of our preferred picks in this space. On the financial front, FIL has a healthy balance, decent cash flow and it has lowered its debt to comfortable levels over the years. We have initiated a BUY on the stock with a target price of Rs 222.

### Research Product Basket

- For every client, the advisor must allocate a specific proportion of funds for trading and investing depending on the risk taking ability and willingness of the client and their investment goals.
- The below mentioned product basket tries to address the way to deal with the trading portfolio (cash/derivative) for optimum effectiveness of research calls.
- It is recommended to divide your trading funds for various types of calls and not invest the entire amount for 1 or 2 calls only.

For cash market trading					For 1L margin*	
Call / Product	Call Frequency	No. of calls	Avg open call duration	% funds allocated	Total	Per Call
Intraday Calls	Intraday	2 - 3	< 1 day	25%	25,000	8,000
Live / RMD Calls	Daily	3 - 4	3 - 4 days	30%	30,000	4,000
Master Pick	Weekly	1	1 month	15%	15,000	5,000
Religare Alpha	Opportunity	NA	2 - 3 months	20%	20,000	As per weightage
Cash		NA		10%	10,000	
<b>Intraday Calls</b>	These calls are flashed live on Ms Lync and ODIN with the purpose of squaring off positions on the same day. As a policy, we restrict our intraday cash market calls to less than 4 calls a day. Hence, funds should be allocated accordingly to have provision to trade in all calls.					
<b>Live / RMD Calls</b>	2 super ideas are flashed in RMD daily with a view of 3-4 days. Additionally as per market opportunity, we flash live calls during the day (including BTST calls). 3-4 such calls are made on a daily basis which might be open for 3-4 days. Funds should be allocated keeping in mind that there will be 7-8 such open calls daily.					
<b>Master Pick</b>	This is our weekly recommendation shortlisted on the basis of techno-funda analysis. 15% of funds is recommended to be allocated for Master Pick considering that there will be 3 open calls. The average open duration for this call will be 1 month.					
<b>Religare Alpha</b>	This is a portfolio of 8-10 stocks which are held with a view of 2-3 months. It is recommended to allocate 20% of funds for building this portfolio which will provide stability to the overall trading portfolio.					
<b>Cash</b>	10% surplus cash in the portfolio should be kept for the purposes of allocating it to opportunities as and when they arrive.					

For derivative market trading					For 1L margin*	
Call / Product	Call Frequency	No. of calls	Avg open call duration	% funds allocated	Total	Per Call
Derivative Ideas	Daily	1 - 2	1 - 3 days	40%	40,000	40,000
Live calls	Intraday / Daily	1 - 2	3 - 4 days	50%	50,000	50,000
Cash		NA		10%	10,000	
<b>Derivative Ideas</b>	1 derivative idea is shared in RMD daily. It can be a plain vanilla F&O buy/sell call or an option strategy. Funds should be allocated assuming 2 such calls will be open at any time. These calls are open for 3-4 days on an average.					
<b>Live Calls</b>	These calls are flashed on MS Lync and ODIN during live market hours. These calls can be intraday or with a view of 2-3 days. Funds should be allocated considering 2 such calls will be open at any time. 3/4 times, these calls will be on Nifty / Bank Nifty only.					
<b>Cash</b>	It is recommended to hold 10% cash to capitalize on any opportunity that may arise in markets.
