### Technical outlook

MCX Silver July futures technical chart has taken the formation of "Rising channel" pattern in daily time frame. Last few sessions ended up in sideways mode along with some corrections inside the channel. The market is expected to continue on bearish momentum based on the current price action,

once the same break below the key support level holding near 71000. The downside rally could be extending all the way up to 70400-69800 levels in the upcoming sessions. An alternative scenario indicates that if the market struggles to break the support level, then it might retest the same and revise the trend to bullish/sideways mode once again. Key resistance holds near 71600. A slide to 72200-72800 is also a possibility if the price makes or break above the current resistance level.
