Market Review

US: U.S. stocks closed mostly lower Friday and booked losses for the week, with bank shares under pressure after the Federal Reserve said it would not extend temporary relief from capital-requirement rules for banks, and the Department of Justice was said to be investigating Dow component Visa Inc. but technology shares recovered some ground.

Asia: Asian markets were holding their nerve on Monday as a plunge in the Turkish lira tested risk appetite, with stocks and bonds showing only a limited bid for safe-havens.

India: Snapping five session losing streak, Indian benchmark indices closed higher on Friday, undermining weak cues from Asian peers. The BSE Sensex surged 641 points or 1.3% to close at 49,858, and the NSE Nifty ended at 14,736.80, up by 178.95 points or by 1.23%. In line with benchmark indices, the broader markets also settled in green. **Market is expected to open on flattish note and likely to witness sideways move during the day.**

Global Economy: Bank of Japan Governor Haruhiko Kuroda said that the central bank would not stop buying exchange-traded funds or sell them as it proceeds with yield curb control policy without affecting share prices.

The No. 2 official at the IMF pointed to emerging signs of a stronger global economic recovery, but warned that significant risks remained, including the emergence of mutations of the coronavirus. IMF First Deputy MD Geoffrey Okamoto said that in early April the Fund would update its January forecast for global growth of 5.5% to reflect additional fiscal stimulus spending in the United States, but gave no details.

China's monetary policy needs to focus on supporting economic growth in a targeted way while also reducing financial risks, the central bank head said. "Monetary policy needs to strike a balance between supporting economic growth and preventing risks," People's Bank of China (PBOC) Governor Yi Gang said.

Commodities: Oil prices resumed their decline on Monday, falling around 1% as worries about a drop in demand for fuel products in the wake of yet more European lockdowns dominated trading.

Gold prices fell on Monday as Turkey replacing its central bank governor with a high interest rate critic led to investors flocking towards the safety of the dollar, on fears that the move would threaten other financial markets.

Currency: The Turkish lira slumped toward a record low versus the dollar after President Tayyip Erdogan stunned investors over the weekend by replacing the hawkish central bank governor with a critic of high interest rates.

Vehicle scrapping policy: Experts say scheme not sales bonanza for firms

According to the MoRTH's estimates, India has 5.1 million light motor vehicles which are 20-year-old or older; those above 15-year-old are estimated at 3.4 million. The ministry estimates the volume of M&HCVs (medium and heavy commercial vehicles) more than 15-year-old and without a valid fitness certificate to be 1.7 million. Given that it's a voluntary policy, manufacturers should not expect any bonanza out of it. Also given the timelines proposed and tad lower incentives than anticipated, industry experts believe the benefits will be back-ended in nature. (ET)

Fiscal status check: Deficit may soar to 9.5% this FY, hits two-thirds of revised full-year forecast

India's fiscal deficit stood at 66.8% of the revised Budget estimates for the current fiscal, as of end of January 2021, according to the data by the Controller General of Accounts (CGA). In absolute terms, the difference between government's revenue and expenditure stood at Rs 12.34 lakh crore. To factor in the impact of COVID-19 pandemic, the government more than doubled the entire year's target to Rs 18.48 lakh crore, or 9.5% of estimated GDP, from Rs 7.96 lakh crore earlier. According to the revised estimates in the Union Budget 2021, the fiscal deficit in the year ending March 31, 2021, is estimated to surge up to 9.5% of the GDP or Rs 18.48 lakh crore, funded through government borrowings, multilateral borrowings, small saving funds and short term borrowings.
