

Nifty Outlook

Markets traded volatile and settled marginally in the green on the day of monthly expiry of May month contracts. The benchmark indices witnessed a firm start but profit taking at higher levels capped the upside as the day progressed. Meanwhile, volatile swings witnessed across the board wherein banking showed tremendous resilience while oil&gas and realty traded subdued and ended lower.

Markets are now eyeing announcements on unlocking by the states which is fueling the recovery. Besides, stability in the global markets after the Fed assurance is also helping the index to sustain at higher levels. We're currently seeing most sectors, barring metal, participating in the move and expect this trend to continue. Participants should continue with the "buy on dips" with focus on sector and stock selection.

Investment Pick - Crompton Greaves Consumer Electricals Ltd.

Scrip	CMP	Recommendation Price	Target	Duration
Crompton Greaves Consumer Electricals Ltd.	400.6	396	479	9-12 Months

Crompton Greaves Consumer Electricals (CGCE) reported strong set of numbers for Q4FY21. Its consolidated revenue grew by 48.3% YoY led by strong growth across geographies and different product categories. The net profit was boosted (+144% YoY) by a one-time tax write back and a sharp rise (+72.2% YoY) in other income. In the near term, demand would be impacted on account of on-going restrictions and expect normalcy by Q2FY22.

We like CGCE for its strong growth potential, consistent rise in market share in its key segment coupled with healthy dividend pay-out ratio, strong cash flow generation, lean working capital cycle and robust return ratios. Factoring the impact of demand uncertainty in the near term, we have lowered our estimates for FY22E. We maintain a Buy on the stock with a target price of Rs. 479.
