

Nifty Outlook

Markets took a breather after the recent surge and lost nearly half a percent. The benchmark opened on a negative note following weak global cues and hovered in a range till the end. Consequently, the Nifty index ended lower by 0.5% at 15,036 levels. Amongst the sectors, profit-taking was witnessed in banking, metal and auto whereas realty, healthcare and power ended with decent gains. Amid all, the market breadth was inclined marginally on the positive side.

We feel it's a healthy pause and expects the prevailing up move to continue. Meanwhile, participants should keep a close eye on the global cues and COVID-related updates. We've started seeing rotational buying across the sectors so the focus should be on sector and stock selection.
