

# Sensex (48691) / Nifty (14696)

On Wednesday, our markets corrected in the first couple of hours on the back of weak global cues and tested the **14700** support. We witnessed some intraday pullback from there, but again indices corrected sharply as we approached the close and Nifty ended the day tad below **14700** with a loss of over a percent.

Some of the Asian markets such as Nikkei, Taiwan and KOSPI witnessed a sharp correction which raised concerns on the weekly expiry day and hence, our markets too witnessed some nervousness ahead of the mid week holiday. Nifty consolidated within the range of **14700** and **14800** for most part of the day and ended with some profit booking towards the end at the lower end of the range. With sector rotations seen, this does not look to be any severe price wise correction as of now, but we interpret this as a continuation of a time-wise correction and markets have just corrected from the higher end of range in the last couple of sessions. Hence, we expect such time correction to continue and thus traders should continue to focus on stock/sector specific moves from a trading perspective. As far as levels are concerned, the immediate supports for Nifty are placed around **14650** and **14585** whereas resistance is seen around **14780-14800**.

| Key Levels        |                      |
|-------------------|----------------------|
| Support 1 – 14650 | Resistance 1 – 14780 |
| Support 2 – 14585 | Resistance 2 – 14800 |

## Nifty Bank Outlook - (32452)

Since last couple of days, the global markets have become a bit shaky and it's weighing down to some extent on our markets as well. The banking index opened lower on Wednesday and then had shown some signs of recovery around the mid session. However from nowhere the selling augmented in the last hour to drag the index at the lowest point of the day by shedding more than a percent to the previous close. Overall, key indices are still directionless as they are trapped in a broad range. Within this, the way some of the heavyweight stocks corrected, it does not bode well for the bulls. The coming session would be quite crucial because it will give us the weekly close and importantly, the picture will get slightly clear. Hence, it would be interesting to see how the overall activity pans out. As far as levels are concerned, 32700 - 33000 are to be seen as immediate hurdles; whereas on the lower side, crucial supports are placed around 32200 -32000.

## **Exhibit 1: Nifty Daily Chart**

## **Exhibit 2: Nifty Bank Daily Chart**

# Angel Broking

#### **Comments**

- The Nifty futures open interest has increased by 2.23%. Bank Nifty futures open interest has increased by 8.07% as market closed at 14696.50 levels.
- The Nifty May future closed with a premium of 13.5 point against a premium of 27.50 point in last trading session. The June series closed at a premium of 44.45 point.
- The INDIA VIX increased from 19.83 to 20.08. At the same time, the PCR-OI of Nifty has decreased from 1.27 to 1.01.
- Few of the liquid counters where we have seen high cost of carry are TATAPOWER, IDEA, RBLBANK, SIEMENS and BANKBARODA.

#### View

- On Wednesday, we started-off the session slightly lower and saw some selling pressure during initial few hours of trade to drag index below 14700 mark. Some recovery was seen but this got sold into to eventually conclude the day with a cut of a percent.
- FIIs were net sellers in the cash segment to the tune of Rs. 1261 crores. In index futures front, they sold worth Rs. 555 crores with decent amount of rise in open interest indicating fresh short formation on Wednesday's session.
- In F&O space, we witnessed fresh short formation in both the indices. As far as options activities are concerned, we saw decent writing 14700-15000 call options in the coming weekly series. On the other side, some build-up was seen in 14700 put strike. FIIs continued with their selling streak in equities, index and stock futures. The premium for Nifty futures have shrunk recently, which hints lack of buying interest. In addition, due to good amount of writing in OTM calls the PCR-OI has plunged to 1.01. The above development in F&O space is not so encouraging for Bulls; however, the border market still looks strong and hence, its advisable to prefer stock centric approach until we don't see any correction below 14600-14650 on the closing basis.
