

## CRUDEOIL

25/11/2021

### Technical outlook

MCX Crude Oil technical chart has taken the formation of "Descending broadening wedge" pattern in 4hr time frame. While few sessions have been in sideways rallies with some corrections. The last one has traded sideways and closed in slight red. As per the technical aspects based on the current price action, the market is expected to continue on bearish trend, once the same break

below the current key support level holding near 5840. The downside rally could be testing all the way up to 5780-5730 levels in the upcoming sessions. An alternative scenario indicates that if the market struggles to break the support level, then it might retest the same and revise the trend to bullish/sideways mode once again. Key resistance holds near 5900. A slide to 5960-6010 is also a possibility if the price makes or break above the current resistance level.
