

## Nifty Outlook

Markets extended rebound for the second consecutive session and gained nearly 2%, tracking firm global cues. After the upbeat start, the benchmark moved from strength to strength for most of the day however marginal selling in the last hour trimmed some gains. Consequently, the Nifty ended with gains of 1.9% at 15,638 levels. All the sectors participated in the move wherein media, PSU banks and metals gained maximum. The broader indices, Midcap and Smallcap, too ended higher and gained over 3.5% each.

This move has certainly eased some pressure but sustainability is the key. Participants are keenly eyeing the US Fed chair's speech for cues and the progress of the monsoon is also on the radar. A decisive move above 15,700 in Nifty can further fuel the rebound to the 16,000 zone else the decline would resume. Stocks, on the other hand, are offering opportunities on both sides so traders should plan accordingly.

**EICHERMOT** has been consolidating in a broader range for the last one and a half years. It is forming higher highs and higher lows within that range and currently holding strongly above the support zone of multiple moving averages on the daily chart. The chart pattern and buoyancy in the auto pack are pointing towards a steady up move to continue. We thus advise initiating fresh longs as per the given levels.
