

Nifty Outlook

Markets traded lackluster and ended marginally in the red, tracking mixed cues. The beginning was downbeat following negative global cues however the index managed to recoup its losses and traded in a narrow range thereafter. Finally, Nifty ended lower by 0.2% at 15,824 levels. The broader markets too ended flat. Amongst the sectors, a mixed trend was witnessed wherein Consumer Durables, IT and Metal ended with gains while Auto, Capital Goods and Oil & Gas ended with losses.

Going forward, the earnings announcement from select Nifty majors combined with global cues will dictate the trend. Meanwhile, we reiterate our view to limit leveraged positions and wait for further clarity.

Investment Pick - CSB Bank Ltd.

Scrip	CMP	Recommendation Price	Target	Duration
CSB Bank Ltd.	352.2	349	432	9-12 Months

Established in 1920, CSB Bank Ltd (known as The Catholic Syrian Bank) is one of the oldest private sector banks in India. It has a significant network in Kerala, Tamilnadu, Karnataka and Maharashtra. At present, 90% of the branches are in these four states and the remaining 10% is spread across other states in India. The bank operates mainly in four business areas namely SME banking, retail banking, wholesale banking and treasury operations.

We believe CSB bank is well placed as it has a strong gold loan book, prudent management team and steady financials with improved asset quality. Further, a well-planned strategy like betting on less risky businesses such as agriculture, food & service, etc. and avoiding risky unsecured loans augurs well for future growth. From a long term perspective, we are optimistic on the company's growth prospects thus initiating a Buy on the stock with a target price of Rs 432.
