CRUDEOIL

Crude oil trading range for the day is 6723-7225.

Crude oil rose after government data showed US crude stockpiles declined by the most in four months.

US crude inventories shrank by 7.056 million barrels last week, much more than market expectations of a 0.275-million-barrel decrease.

Oil output in the Permian in Texas and New Mexico, is due to rise 79,000 barrels per day (bpd) to a record 5.408 million bpd in September

The EU said that it was studying Iran’s response to a “final” draft agreement on reviving the 2015 nuclear accord

NATURAL GAS

Natural gas trading range for the day is 698.1-784.1.

Natural gas dropped on forecasts for less hot weather and lower air conditioning demand over the next two weeks than previously expected.

That small price decline came despite a drop in daily output, hotter-than-normal weather on the West Coast and in Texas, and near-record global prices.

Average gas output in the U.S. Lower 48 states rose to 97.3 bcf so far in August from a record 96.7 bcf in July.

Average U.S. gas demand, including exports, would rise from 95.0 bcf this week to 96.3 bcf next week.
